

Queue management system for bakery

MICROTOUCH Lite is the new multimedia queue management system for RETAIL and MULTIFOOD stores. It's a really flexible solution that offers the possibilities to manage up to 5 different services. QS-MICROTOUCH touch-screen printer 9.7" is the main unit with SOFTLITE license in-built.

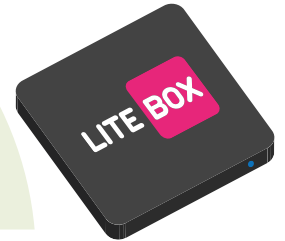

All information are show on standard LCD/TV screen with HDMI output connected to the LITEBOX unit. The monitor has a standard screen layout with Logo of the Store, time, weather, RSS news and shows numbers of all service departments. The operators will call next customer trough a wi-fi console (WCONS) with power adaptor. MICROTOUCH Lite already include vocal call of number and service and a text-to-speech engine to send vocal messages to the customers. Media contents can be shown also on the touch printer unit, near the service buttons, for specific marketing actions before sales. It's also available an optional software module for statistical reports.

As required by law MICROTOUCH system units have received CE approval.

Note: All **MICROTOUCH** system hardware units can also be installed in Wi-Fi mode.

Queue management system for bakery
